Introduction

UNIT 1.01 – GROUP A (3-AXIS) SYLLABUS

1. FLIGHT PREPARATION AND GROUND HANDLING

- 1.1 Complete pre and post flight administration
- 1.2 Cockpit familiarisation
- 1.3 Fuel System
- 1.4 Plan Fuel Requirements
- 1.5 Refuel aeroplane
- 1.6 Perform checks as appropriate
- 1.7 Taxiing aeroplane
- 1.8 Procedures

2. RADIO EQUIPMENT AND PROCEDURES

- 2.1 Radio equipment
- 2.2 Procedures

3. EFFECT OF CONTROLS

- 3.1 Airmanship considerations
- 3.2 Primary effects
- 3.3 Secondary and further effects
- 3.4 Ancillary controls and additional effects

4. STRAIGHT AND LEVEL

- 4.1 Airmanship considerations
- 4.2 Maintain straight and level flight

5. CLIMBING AND DESCENDING

- 5.1 Airmanship
- 5.2 Climbing aeroplane
- 5.3 Descending aeroplane

6. TURNING

- 6.1 Airmanship
- 6.2 Level Turns
- 6.3 Climbing turns
- 6.4 Descending turns

7. STALLING

- 7.1 Airmanship
- 7.2 Stall and recover aeroplane with or without flaps (if fitted)

7.3 Stall and recover aeroplane in various attitudes with or without flaps and with various power settings

7.4 Demonstration of stall entry at greater than 1G

8. CIRCUITS

8.1 Airmanship

8.2 Conduct circuits

8.3 Take-offs and approaches / landings

8.4 Short field circuits

8.5 Emergencies and precautions in the circuit

8.6 Go-around procedures

9. FORCED LANDING AND PRECAUTIONARY SEARCH

9.1 Airmanship

9.2 Forced landings

9.3 Sideslip aeroplane

9.4 Precautionary search and landing

10. OPERATIONS IN THE TRAINING AREA

10.1 Airmanship

10.2 Transit to and from training area

11. MANAGE ABNORMAL SITUATIONS AND EMERGENCIES

11.1 Control systems

11.2 Other abnormal or emergency situations

UNIT 1.02 – GROUP B (WEIGHT SHIFT) SYLLABUS

1. FLIGHT PREPARATION

1.1 Aeroplane Stability and Control

1.2 Complete pre & post flight administration

1.3 Perform Daily and Pre-flight Inspection

1.4 Certify Daily Inspection

2. THE CONTROLS

Flight Controls

2.1 Pitch

2.2 Roll

2.3 Trim

Engine Controls

2.4 Master / Ignition

2.1 Throttle

2.6 Start and Stop engine

3. INSTRUMENTS

3.1 Engine management instruments

3.2 Fuel management instruments

3.3 Flight instruments

4. FUEL SYSTEM, USE AND MANAGEMENT

- 4.1 Fuel System
- 4.2 Plan Fuel Requirements
- 4.3 Refuel aeroplane

5. TAXIING

- 1.5 Taxi Aeroplane

6. CARRY OUT PRE TAKE-OFF CHECKS

- 6.1 Carry out pre take-off checks

7. TAKE-OFF AEROPLANE

- 7.1 Line-up Aeroplane
- 7.2 Take-off
- 7.3 Perform after take-off checks

8. OPERATION OF CONTROLS / STRAIGHT AND LEVEL FLIGHT

- 8.1 Demonstration of Stability
- 8.2 Operation of Controls
- 8.3 Maintain Straight and Level Flight
- 8.4 Maintain Straight and Level Flight At Various Airspeeds

9. CLIMBING AND DESCENDING

- 9.1 Climbing
- 9.2 Descending

10. TURNING FLIGHT (maximum 45° AoB)

- 10.1 Level, Climbing and Descending Turns
- 10.2 Billow Shift

11. STALL ENTRY AND RECOVERY

- 11.1 Approach Stall
- 11.2 Stall Entry
- 11.3 Stall Recovery
- 11.4 Stall Recovery While Turning

12. CIRCUITS

- 12.1 Perform Circuits and Approach For Landing

13. LANDING

- 13.1 Normal Landing
- 13.2 Cross Wind Landing

14. MISSED APPROACHES

- 14.1 Missed Approach and Go Around

15. ENGINE FAILURE ON TAKE-OFF

- 15.1 Manage Engine Failure on Take-Off

16. ENGINE FAILURE IN CIRCUIT

16.1 Manage Engine Failures in all Areas of the Circuit

17. FIRST SOLO

17.1 Perform Solo Flight

18. STEEP TURNS

18.1 Steep Turns (>45° AoB)

18.2 Steep Descending Turns (max 45° AoB)

18.3 Spiral Dive Recovery

19. FORCED LANDING

19.1 Perform a Forced Landing

20. MANAGE ABNORMAL SITUATIONS

20.1 Recover from Unusual Attitudes

20.2 Tuck/Tumble Avoidance

20.3 Manage In-Flight Abnormal Situations

21. PRECAUTIONARY SEARCH AND LANDING

21.1 Conduct Precautionary Search and Landing

22. OFF-AIRFIELD OPERATIONS

22.1 Short Field Take-off

22.2 Short Field Landing

22.3 Soft Field Take-off

22.4 Soft Field Landing

23. LOW LEVEL OPERATIONS (100FT-1000FT AGL)

23.1 Safety and Navigation

24. DEPART AND REJOIN CIRCUIT

24.1 Depart Circuit

24.2 Rejoin Circuit

25. FIRST TRAINING AREA SOLO

25.1 Perform Solo Flight in Training Area

UNIT 1.03 – GROUP D (POWERED PARACHUTE) SYLLABUS

1. THE AEROPLANE (Daily inspection)

1.1 Complete pre & post flight administration

1.2 Perform daily and pre-flight inspection

1.3 Certify daily inspection

2. THE CONTROLS

Flight controls

2.1 Pitch

2.2 Yaw**Engine Controls****2.3 Master / Ignition****2.4 Throttle****2.5 Fuel supply****2.6 Start and stop engine****2.7 Base operations****3. INSTRUMENTS****3.1 Engine management instruments****3.2 Fuel management instruments****3.3 Flight instruments****4. FUEL SYSTEM, USE AND MANAGEMENT****4.1 Fuel system****4.2 Plan fuel requirements****4.3 Refuel aeroplane****5. TAXIING****5.1 Taxi aeroplane****6. ENGINE WARM UP AND CARRY OUT PRE TAKE-OFF CHECKS****6.1 Carry out Pre Take-off checks****7. TAKE-OFF AEROPLANE****7.1 Line-up aeroplane****7.2 Canopy transition****7.3 Take-off****7.4 Perform after take-off checks****7.5 Short field take-off****8. STRAIGHT AND LEVEL FLIGHT****8.1 Maintain straight and level flight****9. CLIMBING AND DESCENDING****9.1 Climbing****9.2 Descending****10. TURNING FLIGHT****10.1 Level, climbing and descending turns****11. CANOPY STALL RECOVERY PROCEDURES****11.1 Canopy stall****11.2 Canopy collapse****12. ENGINE FAILURE ON TAKE-OFF****12.1 Manage engine failure on take-off****13. ENGINE FAILURE IN CIRCUIT (GLIDE APPROACH)****13.1 Manage engine failure on crosswind, downwind, base and final circuit legs**

14. CIRCUITS

- 14.1 Perform circuits and approach for landing

15. LANDING

- 15.1 Normal landing
- 15.2 Cross wind landing
- 15.3 Short field landing
- 15.4 Soft field landing

16. MISSED APPROACH AND GO-AROUND

- 16.1 Missed approach and go around

17. FIRST SOLO CIRCUIT

- 17.1 Perform solo flight circuit

18. FORCED LANDING

- 18.1 Perform a forced landing on take-off
- 18.2 Perform a forced landing in the circuit
- 18.3 Perform a forced landing in training area

19. MANAGE ABNORMAL SITUATIONS

- 19.1 Unusual Canopy inflation
- 19.2 Steering line failure
- 19.3 Manage in-flight abnormal situations

20. PRECAUTIONARY SEARCH AND LANDING

- 20.1 Conduct precautionary search and landing

21. TRAINING AREA SOLO

- 21.1 Perform solo flight in training area

UNIT 1.04 – PASSENGER CARRYING ENDORSEMENT SYLLABUS

1. PASSENGER CARRYING ENDORSEMENT

- 1.1 Brief passenger
- 1.2 Seat and secure passenger
- 1.3 Monitor and manage passenger
- 1.4 Pilot the aeroplane
- 1.5 Emergency situations
- 1.6 Legal considerations

UNIT 1.05 – CROSS COUNTRY ENDORSEMENT SYLLABUS

1. CROSS COUNTRY FLIGHT

- 1.1 Prepare flight plan and comply with airspace requirements
- 1.2 Notification and SARWATCH
- 1.3 Navigate aeroplane
- 1.4 Low level navigation

- 1.5 Perform lost procedure
- 1.6 Plan and perform diversion
- 1.7 Execute arrival procedures
- 1.8 Use of electronic devices as a supplement to navigational procedures

UNIT 1.06 – FORMATION ENDORSEMENT SYLLABUS

1. AIRMANSHIP

- 1.1 Airmanship considerations

2. FLYING LEAD

- 2.1 Brief and lead a formation

3. FLYING NON-LEAD

- 3.1 Maintain station while taxiing
- 3.2 Stream Take-off
- 3.3 Maintain station in flight
- 3.4 Conduct join-up and breakaway manoeuvres
- 3.5 Formation signals
- 3.6 Change of leader
- 3.7 Approach and landing

4. EMERGENCY PROCEDURES

- 4.1 Engine problems
- 4.2 Collision
- 4.3 Radio failure

UNIT 1.07 – ADVANCED PILOT AWARD SYLLABUS

1. AIRMANSHIP

- 1.1 General Airmanship

2. TAKE-OFF SAFETY BRIEF

- 2.1 Engine failure safety brief

3. STEEP LAZY EIGHTS

- 3.1 Entry
- 3.2 Maintenance
- 3.3 Airmanship

4. MAINTAIN BALANCED FLIGHT

- 4.1 Co-ordination

5. STEEP 360 DEGREE GLIDING TURNS

- 5.1 Entry
- 5.2 Maintenance
- 5.3 Exit

6. SIDESLIPPING

- 6.1 Entry
- 6.2 Maintenance
- 6.3 Exit

7. SLIPPING TURNS

- 7.1 Entry
- 7.2 Maintenance
- 7.3 Exit

8. PRE-STALL RECOGNITION AND RECOVERY IN A CLIMBING TURN

- 8.1 Entry
- 8.2 Maintenance
- 8.3 Exit

9. PRE-STALL RECOGNITION AND RECOVERY FROM A STEEP GLIDING TURN

- 9.1 Entry
- 9.2 Maintenance
- 9.3 Exit

10. GROUND REFERENCE MANOEUVRES (Constant Altitude/Radius Turns)

- 10.1 Entry
- 10.2 Maintenance
- 10.3 Exit

11. GLIDE FROM OVERHEAD THE FIELD

- 11.1 Aeroplane positioning
- 11.2 Glide
- 11.3 Touchdown point nominated
- 11.4 Lookout

12. CROSSWIND TAKE-OFF AND LANDING

- 12.1 Take-off
- 12.2 Circuit
- 12.3 Approach
- 12.4 Lookout

13. SHORT FIELD APPROACH

- 13.1 Pre-Landing Checks
- 13.2 Airspeed maintenance
- 13.3 Use of Power
- 13.4 Touchdown Point

14. WEIGHT AND BALANCE

- 14.1 Loading, and Weight and Balance

15. PERFORMANCE FIGURES

- 15.1 MTOW
- 15.2 Normal Approach
- 15.3 Vs

- 15.4 Va
- 15.5 Vne
- 15.6 Short Field Approach Speed

UNIT 1.08 – LOW LEVEL ENDORSEMENT SYLLABUS

1. LEGAL REQUIREMENT

- 1.1 RA-Aus Operations Manual (OM)
- 1.2 CAR, CASR, CAO 95.55, 95.32, 95.10

2. AEROPLANE HANDLING

- 2.1 General aeroplane handling at altitude
- 2.2 Stall symptoms and recovery at altitude
- 2.3 Advanced manoeuvres at altitude

3. FACTORS AFFECTING SAFETY DURING LOW LEVEL FLIGHT

- 3.1 The effects of wind
- 3.2 The effects of turbulence
- 3.3 Effect of light on hazard sighting
- 3.4 Lookout
- 3.5 Obstacles
- 3.6 Bird Behaviour

4. LOW FLYING

- 4.1 Low level flight over flat terrain
- 4.2 Low level flight over undulating terrain
- 4.3 Low level medium turns <45° AoB
- 4.4 Low level steep turns 45°- 60° AoB
- 4.5 Max rate / min radius turns at MTOW
- 4.6 Slow flight
- 4.7 Methods of losing height
- 4.8 Emergency procedures

UNIT 1.09 – GLIDER TOWING (GT) SYLLABUS

1. NORMAL PROCEDURE

- 1.1 Ground Preparation
- 1.2 Take-off
- 1.3 Climb
- 1.4 Release
- 1.5 Descent
- 1.6 Approach and Landing
- 1.7 Cruising on tow
- 1.8 Descending on tow

2. ABNORMAL PROCEDURES

- 2.1 Take-off run aborted
- 2.2 Partial Power Failure

- 2.3 Glider airbrakes open during climb
- 2.4 Order to glider pilot, release glider
- 2.5 Glider unable to release
- 2.6 Glider and Tug unable to release

UNIT 1.10 – HANG GLIDER TOWING (HGT) SYLLABUS

1. NORMAL PROCEDURE

- 1.1 Ground Preparation
- 1.2 Take-off
- 1.3 Climb
- 1.4 Release
- 1.5 Descent
- 1.6 Approach and Landing

2. ABNORMAL PROCEDURES

- 2.1 Take-off run aborted
- 2.2 Partial Power Failure
- 2.3 Order to hang glider pilot, release hang glider
- 2.4 Hang glider unable to release
- 2.5 Hang glider and Tug unable to release

UNIT 1.11 – TYPE TRAINING SYLLABUS

1. TAKE-OFF AEROPLANE

- 1.1 Take off aeroplane

2. CONTROL AEROPLANE IN NORMAL FLIGHT

- 2.1 Climb aeroplane
- 2.2 Maintain straight and level flight
- 2.3 Descend aeroplane
- 2.4 Turn aeroplane
- 2.5 Control aeroplane at slow speed
- 2.6 Steep turns
- 2.7 Stall and recover aeroplane-clean, no power
- 2.8 Stall and recover aeroplane-flaps (if fitted)
- 2.9 Stall and recover aeroplane in turns with or without flaps and with various power settings

3. CIRCUITS

- 3.1 Conduct circuits
- 3.2 Cross-wind circuits
- 3.3 Short Field circuits

4. EMERGENCIES

- 4.1 Emergencies and precautions in the circuit
- 4.2 Go-around procedures

5. FORCED LANDINGS

- 5.1 Forced landings
- 5.2 Sideslip aeroplane

6. MANAGE ABNORMAL SITUATIONS

- 6.1 Control systems
- 6.2 Other abnormal or emergency situations

UNIT 1.12 – TAIL WHEEL UNDERCARRIAGE AEROPLANE SYLLABUS

1. PRE-FLIGHT

- 1.1 Considerations before start up

2. GROUND HANDLING

- 2.1 Considerations on the ground

3. TAKE-OFF AND LANDING

- 3.1 Normal Operations
- 3.2 Rough or Soft Field Operations

UNIT 1.13 – TWO STROKE ENDORSEMENT SYLLABUS

1. Two Stroke Engines

- 1.1 Theory and Pre-flight
- 1.2 In Flight Operation
- 1.3 Refuelling

UNIT 1.14 - IN FLIGHT ADJUSTABLE PROPELLER ENDORSEMENT SYLLABUS

1. THEORETICAL UNDERSTANDING

- 1.1 Theoretical Understanding

2. NORMAL OPERATIONS

- 2.1 Pre-flight Inspection
- 2.2 Fine pitch and climb performance
- 2.3 Coarse pitch and cruise performance
- 2.4 Landing and circuit operation
- 2.5 Engine instrumentation and limitations

3. EMERGENCY OPERATIONS

- 3.1 Engine Failure
- 3.2 Engine Failure Simulation
- 3.3 Fully Feathered Operations
- 3.4 Pitch System Malfunction

UNIT 1.15 - RETRACTABLE UNDERCARRIAGE ENDORSEMENT SYLLABUS

1. THEORETICAL UNDERSTANDING

1.1 Theoretical Understanding

2. NORMAL OPERATIONS

2.1 Gear Extension

2.2 Gear Indication System

2.3 Gear Retraction

3. EMERGENCY OPERATIONS

3.1 Gear Retraction Failure

3.2 Gear Indication Failure

3.3 Gear Extension Failure

3.4 Partial Extension/Retraction

UNIT 1.16 - WATERBORNE FLOAT AND HULL (WF/WH) SYLLABUS

1. MANAGE PRE AND POST FLIGHT ACTIONS

1.1 Complete pre and post flight administration

1.2 Perform pre-flight inspection

1.3 Perform and certify daily inspection

1.4 Launch waterborne aeroplane

1.5 Check for leaks

2. CONTROL WATERBORNE AEROPLANE ON THE WATER

2.1 Start and stop engine

2.2 Low speed (Displacement) taxiing

2.3 Plough Taxiing

2.4 Step Taxiing

2.5 Step Turns

2.6 Leaks

3. TAKE-OFF WATERBORNE AEROPLANE

3.1 Carry out pre-take-off procedures

3.2 Take-off waterborne aeroplane

3.3 Carry out after take-off procedures

4. LAND WATERBORNE AEROPLANE

4.1 Transitional landings

4.2 Conventional landings

4.3 Rough water landings

4.4 Perform go-round procedure

5. EMERGENCY PROCEDURES

5.1 Engine failure after take-off (water or land)

5.2 Manage engine failure elsewhere in circuit (water or land)

5.3 Manage forced landing en-route (water or land)

- 5.4 Conduct precautionary search and landing (land or water)
- 5.5 Capsize
- 5.6 Manage abnormal situations

UNIT 1.17 - UTILITY SYLLABUS

1. FLIGHT PREPARATION AND GROUND ASSESSMENT

- 1.1 RA-Aus Operations Manual (OM)
- 1.2 CAR, CASR, CAO 95.55, 95.32, 95.10
- 1.3 Aircraft Readiness
- 1.4 Pre-flight assessment of location - Property familiarisation
- 1.5 Emergency response planning
- 1.6 Fuel management - aeroplane
- 1.7 Taxiing aeroplane

2. RADIO EQUIPMENT AND PROCEDURES

- 2.1 Radio equipment
- 2.2 Procedures

3. AEROPLANE HANDLING

- 3.1 General aeroplane handling at altitude
- 3.2 Advanced stall symptoms and recovery at altitude
- 3.3 Advanced manoeuvres at altitude

4. SAFETY FACTORS DURING LOW LEVEL FLIGHT

- 4.1 The effects of wind
- 4.2 The effects of turbulence
- 4.3 Effects of light on hazard sighting
- 4.4 Lookout
- 4.5 Obstacles
- 4.6 Fatigue Management

5. LOW FLYING

- 5.1 Low level flight over flat terrain
- 5.2 Low level flight over undulating terrain
- 5.3 Low level medium turns 45° AoB
- 5.4 Low level steep turns 45°-60° AoB
- 5.5 Max rate / min radius turns at MTOW
- 5.6 Slow flight
- 5.7 Methods of losing height
- 5.8 Emergency procedures

INTRODUCTION TO THEORY - LEVELS OF KNOWLEDGE AND APPLICATION

UNIT 2.01 – BASIC AERONAUTICAL KNOWLEDGE SYLLABUS

1 PRINCIPLES OF FLIGHT 1.1- AERODYNAMICS

1 PRINCIPLES OF FLIGHT

1- AERODYNAMICS

1.2 – STABILITY AND CONTROL

2 OPERATION OF AN AEROPLANE

2.1- MANOEUVERING

2.2 –AEROPLANE PERFORMANCE CONSIDERATIONS

2.3 – AEROPLANE GENERAL KNOWLEDGE

UNIT 2.02 – AIR LEGISLATION SYLLABUS

1 AIR LEGISLATION

1.1 – FLIGHT RULES AND AIR LAW

UNIT 2.03 – NAVIGATION AND METEOROLOGY SYLLABUS

1. CROSS COUNTRY ENDORSEMENT

1.1 – NAVIGATION

1.2 – METEOROLOGY

UNIT 2.04 – RADIO OPERATOR SYLLABUS

1.1 – NAVIGATION

UNIT 2.05 – HUMAN FACTORS SYLLABUS

1.1 - AVIATION MEDICINE

1.2 - HUMAN FACTORS
